

## Evaluation of Associate Deans

Associate Deans will be evaluated annually by the Dean. The evaluation will include a review of the annual FAR supplied by the Associate Dean, teaching evaluations, and a self-statement outlining major activities, projects and accomplishments for the calendar year. The Dean may also consult with or seek input from department chairs and AddRan College faculty when deemed necessary. The evaluation will take place in February. The Dean will meet with the respective Associate Deans and discuss the written report which documents the results of the annual evaluation. The evaluation will also be used for professional development and merit recommendations.
